### **DETAILED ACTION**

1. Claims 1-16 have been examined.

#### ***Specification***

2. Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

Where applicable, the abstract should include the following:

- (1) if a machine or apparatus, its organization and operation;
- (2) if an article, its method of making;
- (3) if a chemical compound, its identity and use;
- (4) if a mixture, its ingredients;
- (5) if a process, the steps.

Extensive mechanical and design details of apparatus should not be given.

5. The method of claim 4, further comprising: deriving additional data to be stored in the first data storage format based on the inputted data and based on the identity of the user; storing the additional data in the first database. {Para 586 teaches deriving associations between the users enterprise id and the entered data}

12. *As per dependent claims 6 and 14, Rauen teaches the limitations as follows:*

6. The method of claim 4, further comprising defining dynamically the data entry format based on the identity of the user. {Para 807 teaches a user profile for storing the language of the user which intern is used to selected the data entry format}

13. *As per dependent claims 8 and 16, Rauen teaches the limitations as follows:*

8. The method of claim 1, further comprising: transforming the data from the data entry format to a second data storage format; and storing the data in a second database in the data storage format.
